## BOOK SYNOPSIS

This is the sixth edition of the leading work on transnational and comparative commercial and financial law, covering a wide range of complex topics in the modern law of international commerce, finance and trade. As a guide for students and practitioners it has proven to be unrivaled. The work is divided into three volumes, each of which can be used independently or as part of the complete work. Volume 1 covers the roots and foundations of private law; the different orientations and structure of civil and common law; the concept, forces, and theoretical basis of the transnationalisation of the law and of dispute resolution in the professional sphere; the autonomous sources of the new law merchant or modern *lex mercatoria*, its finance-driven impulses; and its relationship to domestic and transnational public policy and public order requirements All three volumes may be purchased separately or as part of a single set.
